Hanna Stud News

Hanna Bondadosa is leaving to Australia

Of the 2 beautiful fillies we had born last season, the filly out of Moonshine Lace, by Cancionero CA, which we named Hanna Bondadosa is leaving NZ at the end of August on her long journey to Queensland. Her new home will be North of Brisbane, inland from Rockhampton with Rebecca Power, who is already very excited about the arrival of her new horse.

We had decided to leave both fillies in Auckland when our stud moved to the South Island in April, so that both could mature to a minimum of 8 months before embarking on any longer travel.

Bondadosa will be flying with

IRT from Auckland to Sydney before a long road trip up North.

No doubt she will be looking forward to escaping the wet winter in Auckland, for some lovely sunshine and warmth in Queensland.

Photos on this page: Bondadosa at 1 week, 3 weeks and 4 months.

Final Horse arrives at Alice Pass Farm in August 2008

Our band of PRE horses is finally complete, with the arrival in mid August of the 9 months old filly, Hanna Briososa.

Briososa had remained in Auckland a little while longer until we thought her old enough to tackle the long trip to the

South Island. We were lucky with the Winter weather being kind during the 3 days of her travel. The truck waited a while longer at the Majestic depot in Bulls to take a ferry later in the afternoon. Briosa got to overnight in Christchurch before being delivered at her new home.

Briosa is the first filly ever out of Alondra XXIX, by Cancionero CA and we are very excited to keep her as a future broodmare.

Just about 1 month earlier, **Hanna Enamorada** (Farino x Moonshine Lace), now rising 4 years old, also joined us again from the Waikato.

Thank you so much to Jane & Bev Falconer of Berwick Farm for giving us the opportunity to purchase this great filly back.

Enamorada has inherited the stunning movement of her dam Moonshine Lace and will also be maturing to a good height, we expect just on 160cm. She will be bred to Jaleador de JC III in the future.

Preparations for the 2008 Stud Season

Preparations for the 2008 stud season are in full swing with 2 stallions, Jaleador and Director being offered for services to outside mares this year. Jaleador will be available by AI only, including frozen semen.

Jaleador had a very successful first season in 2007, spending time at Matamata Veterinary Services to have his semen collected for either dispatch to clients or to be frozen. His semen freezes extremely well with a high post-thaw motility. In addition, his frozen semen has also been tested by successfully inseminating a mare, with the resulting foal now eagerly awaited this coming season.

So we are now fully confident that his **frozen semen** can be marketed to potential clients in NZ and overseas.

At our new farm we are frantically putting up all necessary breeding facilities. With building consents taking their time to go through local govern-

ment bodies for approval and the winter in North Canterbury so far not having been the kindest, we had to delay a few things but are confident that we will be ready to dispatch fresh semen from late October onwards.

Jaleador will be shown during this years **Christchurch Stallion Parade** in mid September, so look out for him, if you are attending this event.

We have also had Annie Studholm visit our farm recently, taking lots of great photos, which we will have available soon and which can also be seen on her website www.anniestudholm.com

We were so lucky with the weather, having had just enough dry days to get the opportunity to wash horses and taking pictures without the need for an umbrella. The very next day the heavens opened up again with continuous rain for 3 days—so we were all thrilled about some really clever planning.

News from Spain

Hanna Condesa, the young mare we sold to Spain in 2006 continues her great life as a productive broodmare for her owners in Spain. Marti & Murray Winn of Winnfarms Spanish Stud visited her in July and brought us back some photos of Condesa, her

first black colt by Cancionero CA and her second black colt born last season.

Condesa had been put into foal to the stallion Burlador of

Yeguada Reguero Y Chaparral, that since has been sold for a 6 figure sum to Costa Rica, so her recent colt will be treasured by his owners. Condesa is currently in foal to the Campeon de la Raza, SI-CAB 2007. We are very proud that this lovely mare is given the opportunity to mate with the top stallions of the breed in Spain and are eagerly awaiting the birth of her next foal.

Revision 2008

We would also like to take the opportunity to congratulate all owners for a successful May revision tour. Our stud was represented by 4 studs/owners and 5 horses, which all passed with flying colours, the youngest, Salinero only rising 3.

Congratulations to:

Hanna Galicia, owned and presented by Jane Holm, Baroque Stud, Hunua, Auckland

Hanna Salinero and *Hanna Enamorada*, owned and presented by Bev & Jane Falconer, Berwick Farm, Cambridge.

Hanna Hilandero, owned and presented by Rachael Hocking, Ximena Stud, Rangiora

Hanna Hechizada, owned and presented by Richard and Melanie James, Coburn Iberians, Rangiora.
